

OLUWADAMILOLA AJAYI

FULL-STACK SOFTWARE DEVELOPER

Luton, UK | 07778 545885 | oluwadamilola.william@gmail.com
linkedin.com/in/oluwadamilolaxajayi | github.com/dodomiyake | oluwadamilolaajayi.com

PROFESSIONAL PROFILE

Full-stack software developer experienced in building responsive web applications with React, Next.js, TypeScript, Node.js, Express.js, Supabase and MongoDB. Develops REST APIs, authentication flows, real-time features and Stripe payment integrations, with cloud deployment experience using AWS Amplify and Amazon S3. Combines hands-on engineering with Agile delivery, debugging and stakeholder communication to translate product requirements into maintainable, user-focused software. Continues to deliver independent freelance development projects alongside a current operational role.

CORE SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React, Next.js, Tailwind CSS, Material UI, Bootstrap, Zustand

Backend: Node.js, Express.js, REST APIs, Socket.IO, MVC architecture

Data: Supabase, MongoDB, Mongoose, database schema design, Supabase

Security & Integrations: JWT authentication, role-based workflows, Stripe API

Cloud & Tools: AWS Amplify, Amazon S3, Git, GitHub, Postman, Vite

Quality: Responsive design, accessibility, performance optimisation, debugging, QA testing

Delivery: Agile, Scrum, code review, version control, stakeholder communication

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer | Independent

Aug 2024 – Present

- Design, develop and maintain responsive full-stack web applications for independent and freelance projects alongside primary employment.
- Translate requirements into reusable interfaces, authentication flows, database schemas, APIs and maintainable application architecture.
- Develop current projects including FeyseFit, a cross-platform fashion workspace, and RCCG FLT, a responsive church website for members and visitors.
- Manage delivery from planning and implementation through debugging, testing, version control and deployment using Git and GitHub.

B&M Distribution Centre

FLT Operative – Reach Truck

Dec 2025 – Present

- Operate a reach truck to move, stack and retrieve palletised goods from high-level racking while meeting daily operational targets.
- Complete pre-use inspections covering brakes, steering, tyres and hydraulic systems; report faults and maintain equipment cleanliness and battery readiness.
- Use barcode scanners, radio equipment and warehouse-management systems to maintain accurate stock locations, consolidate partial pallets and support safe stock movements.

Warehouse Operative

Aug 2024 – Nov 2025

- Picked and packed goods accurately using voice-pick technology while maintaining productivity, accuracy and workplace-safety standards.

Web Developer (Freelance) | 100Devs

Jan 2022 – Jul 2024

- Built full-stack web applications using React, Next.js, TypeScript, Node.js, Express.js and MongoDB across project-based and collaborative development work.
- Developed reusable frontend components and REST APIs, improving application performance by approximately 20% and reducing defects during QA testing.
- Integrated JWT authentication, Stripe payments and database-driven functionality, and deployed applications using AWS Amplify and Amazon S3.
- Collaborated in Agile sprints, contributing to planning, code review, debugging and delivery of production-ready features.

Agile Project Manager | TechSkilling by AMS

Jan 2024 – Mar 2024

- Led sprint planning and coordinated minimum viable product delivery under tight deadlines.
- Facilitated stand-ups, sprint reviews and retrospectives, tracked blockers and supported cross-functional issue resolution.

PROJECTS

FeyseFit – Cross-Platform Fashion Workspace

Next.js, TypeScript, Supabase, Tailwind CSS

- Designed and developed a platform connecting fashion designers with local and international clients from enquiry through delivery.
- Implemented workflows for remote measurements, appointments, project tracking, designer discovery and client communication, with authentication and responsive customer/designer experiences.

RCCG FLT – Church Website

Responsive Web Design, Frontend Development, Content Architecture

- Created a responsive church website presenting the ministry, service information, programmes and contact details, with clear navigation for members and first-time visitors.

ZenHaven – Full-Stack E-Commerce Application

Next.js, TypeScript, Tailwind CSS, Zustand, Node.js, Express.js, MongoDB, AWS, Stripe

- Built a responsive e-commerce experience with product browsing, persistent cart state, secure checkout and Stripe payment processing.
- Developed backend services with Node.js, Express.js and MongoDB; deployed using AWS Amplify with media stored in Amazon S3.

Real-Time Chat Application

React, Node.js, Express.js, MongoDB, Socket.IO, Tailwind CSS

- Developed authenticated private and group messaging with avatars, timestamps, typing indicators and real-time file sharing using Socket.IO and a MERN architecture.

YelpCamp – Full-Stack Web Application

Node.js, Express.js, MongoDB, Mongoose, Bootstrap

- Built a campground-listing platform with authentication, protected routes, CRUD operations, reviews and interactive map integration.

ADDITIONAL PROFESSIONAL EXPERIENCE

Recycling Operative | Sweeep Kuusakoski

Jan 2024 – Aug 2024

- Helped reduce contamination rates by 10% and exceeded production targets by 12% while following quality and safety procedures.

Deputy Manager | VFS Global

Jan 2018 – Sep 2023

- Managed operational processes, resolved escalated issues and communicated procedures to employees, customers and stakeholders.
- Streamlined visa-application workflows and led staff training that contributed to a 35% improvement in value-added-service target achievement.

EDUCATION AND CERTIFICATIONS

Bachelor of Technology in Industrial Design | Federal University of Technology Akure

2007

The Web Developer Bootcamp 2024 | Udemy – Colt Steele

Completed Aug 2024

Agile Project Management | TechSkilling by AMS

Completed Mar 2024

Responsive Web Design Developer Certification | freeCodeCamp

Completed May 2022
