PROFILE

Full-stack developer building web applications since 2022 and freelancing since 2024, working in React, Next.js, TypeScript and Node.js, with four products currently live. Works across the whole stack: PostgreSQL/Supabase and MongoDB data models, REST APIs, authentication and row-level security, real-time features, and third-party integrations including HubSpot CRM, Stripe and UK government open-data APIs, delivered through CI/CD to Vercel and AWS. Also builds data-driven products in Python. A degree in Industrial Design and five years as a Deputy Manager at VFS Global add strong product and UI sense, clear stakeholder communication and reliable delivery in Agile teams.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3

Frontend: React, Next.js (App Router, Server Actions), React Native (Expo), Tailwind CSS, Zustand, Vite, PWA, responsive and accessible UI

Backend: Node.js, Express.js, REST APIs, Socket.IO, JWT authentication, role-based access, Zod validation, PDF generation

Data: Supabase (PostgreSQL, Auth, Storage, row-level security), Prisma, MongoDB, Mongoose, NumPy, SciPy, scikit-learn

Integrations & Cloud: HubSpot CRM API, Stripe (incl. webhooks), Resend, public-data APIs, Vercel, AWS Amplify, Amazon S3, GitHub Actions (CI/CD)

Tools & Practice: Git, GitHub, monorepos (npm workspaces), Playwright, Postman, Figma, SEO, debugging, QA testing, Agile/Scrum, code review

DEVELOPMENT EXPERIENCE

Freelance Full-Stack Developer | Independent **Aug 2024 – Present**

- Deliver full-stack web products end to end, from requirements and UI design through database schema, APIs, testing and deployment.
- Shipped four live products on Vercel (**Scorecast, Feyse Clothing Labels, RentCheck and FeyseFit**), with **Metheues Clothings** and **Ohun** in development; see Selected Projects.
- Integrated third-party services including HubSpot CRM, Stripe, Resend and UK government open-data APIs, with failure handling so a third-party outage does not break the core user journey.
- Delivered a live, responsive website for **RCCG God's Love Tabernacle** (rccgglt.org), a UK church, structuring content and navigation for members and first-time visitors.

Software Engineering Programme | 100Devs (part-time) **Jan 2022 – Jul 2024**

- Completed an intensive full-stack programme alongside full-time work, building and deploying React, Node.js, Express.js and MongoDB applications.
- Built projects with JWT authentication and Stripe payments, deployed on AWS Amplify with assets on Amazon S3.
- Worked in Agile teams on group projects, contributing to planning, code review and debugging.

Agile Project Manager | TechSkilling by AMS **Jan 2024 – Mar 2024**

- Led sprint planning and coordinated delivery of a minimum viable product to a tight deadline.
- Ran stand-ups, sprint reviews and retrospectives; tracked blockers and drove cross-functional resolution.

SELECTED PROJECTS

Scorecast – Football Match Prediction Platform scorecast-lemon.vercel.app

Python, NumPy, SciPy, scikit-learn, JavaScript, GitHub Actions, Vercel

- Built a Dixon-Coles bivariate Poisson model fitted on real results across 12 leagues, producing predicted scorelines, outcome probabilities and tips priced against de-vigged bookmaker odds; validated on 2,251 out-of-sample predictions with published calibration.
- Automated a daily GitHub Actions pipeline that fetches fixtures, odds and results (with fallback sources), rebuilds the site and deploys to Vercel; CI runs regression and smoke tests on every change.

Feyse Clothing Labels – Order & Operations Platform feyseclothinglabel.vercel.app

Next.js 16, TypeScript, Tailwind CSS, Supabase (Postgres, Auth, Storage), HubSpot API, Resend, Zod

- Built a WhatsApp-first platform for a UK-managed, Nigeria-produced clothing label: customers submit enquiries, review quotes and invoices and upload payment proof; staff run enquiries, payment checks, production, QC and dispatch from one dashboard.
- Integrated HubSpot CRM, syncing customers as contacts and enquiries as deals mapped to pipeline stages, via a durable outbox with idempotent retries and exponential backoff so a HubSpot outage never blocks an order.
- Secured every table with row-level security and private storage buckets, generated quotation and invoice PDFs server-side, and kept a full audit trail of status changes.

RentCheck – Property Research Tool for Renters rentcheck-three.vercel.app

Next.js, TypeScript, Supabase, Stripe, Zod, Vercel

- Built a mobile-first app that lets renters in England research a property by postcode, combining EPC ratings, police street-level data, Environment Agency flood warnings, food-hygiene ratings and Companies House records with a monthly true-cost calculator.
- Kept API keys server-side and gave each data source independent status and error handling so one failing source never breaks a report; added paid plans with Stripe checkout and webhooks.

FeyseFit – Made-to-Measure Fashion Platform feysefit.vercel.app

Next.js, TypeScript, Prisma, Supabase, Tailwind CSS

- Built a mobile-first platform connecting clients with fashion designers in the UK, Africa and the diaspora, with remote measurements, bookings, project tracking and a designer marketplace with admin approvals, backed by a versioned REST API.

Metheues Clothings – E-Commerce Storefront & Admin github.com/dodomiyake/Metheuesclothing

In development · Next.js 15, React 19, TypeScript, Supabase (PostgreSQL), Stripe, Resend, Zod, Figma

- Designed a 64-screen Figma design system with 9 email templates, and am building the storefront and admin to match it.
- Enforced business rules in PostgreSQL rather than app code: stock can never go negative, idempotent Stripe webhooks decrement stock exactly once, and prices are calculated only on the server.

Ohun – Accessible Real-Time Messaging App github.com/dodomiyake/Ohun

In development · TypeScript monorepo, React + Vite (PWA), React Native (Expo), Express, Socket.IO, Zod, Playwright

- Building a secure, private messaging app for friends and family on web and mobile from one TypeScript monorepo, with shared Zod contracts, design tokens and API client packages, plus lint, type-check, unit and Playwright end-to-end tests.

LEADERSHIP & OPERATIONAL EXPERIENCE

Deputy Manager | VFS Global **Jan 2018 – Sep 2023**

- Contributed to a 35% improvement in value-added-service target achievement by streamlining visa-application workflows and leading staff training.
- Managed day-to-day operations, resolved escalated customer issues and communicated process changes to staff, clients and stakeholders.

FLT Operative (Reach Truck) / Warehouse Operative | B&M Distribution Centre **Aug 2024 – Present**

- Maintain accurate stock records with barcode scanners and warehouse-management systems while meeting daily targets under strict safety procedures.

Recycling Operative | Sweeep Kuusakoski **Jan 2024 – Aug 2024**

- Exceeded production targets by 12% and helped reduce contamination rates by 10%.

EDUCATION & CERTIFICATIONS

B.Tech Industrial Design | Federal University of Technology Akure

The Web Developer Bootcamp | Udemy (Colt Steele) **Aug 2024**

Agile Project Management | TechSkilling by AMS **Mar 2024**

Responsive Web Design Certification | freeCodeCamp **May 2022**
